Office Action Summary

Art Unit: 2622

1. Claims 1 and 3-18 are pending. Claims 1, 4, 5, 7, 8, 9, 10, and 13-15 are independent.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Taguchi (Japanese Patent No. JP407272672A).

Regarding claim 15, Taguchi teaches a light source (fluorescent lamp) having a sealed container (tube 1), a pair of internal electrodes (2a, 2b) and a pair of external electrodes (5a, 5b) disposed outside the sealed container (tube 1). See accompanying drawing figures.

Regarding claims 16 and 17, the figures show two different voltages, one applied between the pair of external electrodes (5a, 5b) producing a discharge between the electrodes (5a, 5b), another one applied between internal electrodes (2a, 2b) producing a discharge between the electrodes (2a, 2b) different from the discharge between the electrodes (5a, 5b).

4. Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
